CEMOTEV'S SEMINARS

Cemotev organizes different seminars, which take place on Thursday, from 10am to noon :

- » **General seminar:** Cemotev's members and outside researchers present their research work there; the sessions are prepared by sending a text to the participants to feed the discussion after the presentation of the speaker.
- » **Specialty seminars** : more targeted on a specific theme and / or methodology.
- » **Workshops organized by doctoral / PhD students:** under the responsibility of their research director, they present an article which reflects the progress of their research and which is then commented on by a rapporteur.

Thursday can also be devoted to one-day workshops on "cross-cutting" themes and / or of common interest.

Seminar's coordination is ensured by Dalila Messaoudi and Natalia Zugravu.
